

Dear Sirs or Ladies at the Federal Communications Commision,

It is to my understanding that the radio station K-LOVE may through your power be eliminated from the area in which I live. My life as yours and many others is very busy but I felt a great need to write this to you to beseech you so that you might consider doing all that you can to keep FM translators. K-LOVE is one of the few stations in my area where my whole family can listen safely without any vulgarness or stations that make "partying" seem like the thing to do. Besides hearing great music they also broadcast area events that I might miss such as concerts and speakers. I am able to share many things I hear on this station to encourage and enlighten so many lives it makes me so sad to think we may not be able to listen. I think K-LOVE is a vital part of our community as in any community. It is an uplifting, positive radio station that so many people I know here count on including friends, co-workers and I know one nurse who I don't have the heart to mention this to would probably shake her world if she knew it was in danger of not being here. I know the FCC is a decent and intelligent part of government. I hope that if you didn't know how much this station means to so many of us that you will be able to get a glimpse by my letter. Thank You for your time.

Respectfully Yours,
Debbie Sweeney
